

# CARG. BATTERY NOVACAR 10A

Ref. 05078

❓ The **Solter NOVACAR 10A** automatic charger is the most reliable and versatile solution to keep your vehicle, marine, agricultural, and recreational equipment batteries in optimal condition. Specifically designed for **12V batteries (lead-acid and gel)**, it offers both **fast and slow charging modes**, easily adapting to each specific need. It features advanced systems for **protection against reverse polarity, short circuits, and overloads**, ensuring complete safety and absolute peace of mind. Thanks to its **compact, rugged, and easy-to-store design**, you'll extend your batteries' lifespan, saving time and money. Trust Solter to protect your investment!

## Key Features:

- ❓ **Intelligent Automatic Charging:** Charges your batteries in two stages, optimizing performance and extending battery life without requiring constant supervision.
- ❓ **Adjustable Current from 3.75 to 8A:** Easily adjust charging intensity according to your needs: **fast charging (8A RMS / 5.4A DC)** for larger batteries, or **slow charging (3.75A RMS / 2.5A DC)** for smaller batteries or regular maintenance.
- ❓ **Universal Compatibility up to 120Ah:** Ideal for **12V batteries** including conventional lead-acid, sealed, and gel types, suitable for cars, motorcycles, boats, agricultural machinery, and recreational vehicles.
- ❓ **Maximum Safety with Comprehensive Protection:** Avoid mistakes and accidents with **reverse polarity protection** featuring a **visual LED indicator**, ensuring consistently safe connections.
- ❓ **Short Circuit and Overload Protection System:** Integrated automatic protection immediately interrupts the charging process in case of anomalies, providing total peace of mind.
- ❓ **Intuitive LED Indicators:** Easily monitor battery status at all times with clear **visual indicators (charging, fully charged, or connection error)**.
- ❓ **Compact and Practical Design:** Easily transport and store your charger thanks to the integrated compartment for cables and clamps, making everyday use convenient.
- ❓ **European Quality Guarantee:** Manufactured under strict European standards (EN 60335-2-29 and EN 55014-2), ensuring maximum durability, reliability, and performance.
- ❓ Choose the reliability and technology of Solter to keep your batteries always ready, safe, and in perfect condition.

# CARG. BATTERY NOVACAR 10A

Ref. 05078

## TECHNICAL DATA

## OPTIONAL ACCESSORIES

### Generals

Use	Cargador de Baterías
Product Code	05078
Tecnologías de protección y carga	Automática, Protección inversión polaridad, Protección contra cortocircuitos, Protección sobrecargas, Modo mantenimiento

### Technical

Voltaje de carga	12V
Capacidad de carga max.	20 - 120Ah
Tipo batería	WET (plomo-ácido). GEL
Corriente de carga eff.	3,75 - 8A
Corriente de carga Arith.	5,4 DC (carga rápida)
Carga de mantenimiento max.	2,5 DC

### Structural

Dimensions	180x235x105
------------	-------------

### Electrical

Supply Voltage	220-240VAC 50/60Hz
----------------	--------------------
