

BLISTER ELEC. RUTILE 1,6mm 35 uds.

Ref. 05905

❓ The [05905] BLISTER ELEC. RUTILE 1.6mm from Solter contains 35 E6013 electrodes designed for welding carbon steel in any position. Thanks to its rutile coating, it provides a smooth arc, easy slag removal, and an excellent finish—even for beginners in welding. Ideal for maintenance, metalworking, and DIY projects. Its 1.6 mm size makes it perfect for thin materials. Start your projects with precision and confidence using Solter!

Main Features:

- ❓ **1.6 mm E6013 electrodes:** Ideal for precision welding on thin materials such as sheet metal or light structural profiles.
- ❓ **Blister pack of 35 units:** Practical presentation, designed for occasional users or small workshops.
- ❓ **Easy ignition and stable arc:** Thanks to its rutile coating, it ensures clean and continuous work, minimizing interruptions.
- ❓ **Suitable for all positions:** Versatile and functional for vertical, horizontal, and overhead welding.
- ❓ **AC and DC compatible:** Works with multiple machines, whether in straight or reverse polarity.
- ❓ **Self-releasing slag:** Simplifies cleanup and enhances work efficiency.
- ❓ With Solter, every electrode is designed to deliver reliability, ease of use, and professional-grade finishes. The red E6013 electrode is the perfect ally for those seeking solid results from the very first arc—without complications.
