

DIFUSER GAS SX-36 2Un

Ref. 05943

❓ The **M6 SX-36 Gas Diffuser** by Solter is an essential consumable for MIG/MAG welding. Designed to ensure a uniform flow of shielding gas, it enhances arc stability, reduces weld bead defects, and delivers a clean, professional finish. Made from **high-resistance ceramic**, it withstands extreme temperatures and demanding working conditions. Its compatibility with **SX-36 torch models** guarantees a perfect fit and optimal performance. Ensure precise, high-quality welds with the Solter guarantee!

Main Features:

- ❓ **Guaranteed Compatibility:** Specifically designed for **SX-36** torches, ensuring a perfect fit and efficient performance.
- ❓ **High-Resistance Material:** Made of **ceramic** to withstand high temperatures and minimize wear from spatter.
- ❓ **Shielding Gas Optimization:** Ensures uniform gas distribution, stabilizing the arc and enabling more precise weld beads.
- ❓ **Convenient Format:** Comes in a **blister pack of 2 units**, ideal for maintaining a steady supply in the workshop.
- ❓ **Standard Dimensions:** With an **M6 diameter**, ensuring compatibility with multiple MIG/MAG systems.
- ❓ **Reliable Performance:** Engineered to operate under demanding conditions without compromising weld quality.
- ❓ **Trust Solter** to provide high-quality welding consumables, designed to deliver **durability, precision, and efficiency** in every application.
