

CERAMIC CUP SR-17/26/18 GR4 D6,5 (2u.) **SOLTER**

Ref. 06200

❓ The Solter GR4 D6.5 Ceramic Nozzle is the ideal solution for high-precision TIG welding. With its 6.5 mm diameter, it allows finer control of shielding gas, ensuring a clean and contamination-free weld pool. Made from high-density ceramic, it withstands spatter and extreme temperatures without compromising stability. Compatible with SR-17, SR-26, and SR-18 torches. Each blister pack includes 2 units for quick and safe replacement. Looking for greater precision in your TIG work? Trust Solter and place your order now!

Main Features:

- ❓ Ultra-precise coverage: The GR4 nozzle with a 6.5 mm diameter is designed to direct shielding gas with pinpoint accuracy—ideal for detailed work or delicate materials.
- ❓ High thermal resistance: Its high-density ceramic composition withstands heat and wear, extending its service life even during intensive welding tasks.
- ❓ Full compatibility: Designed for standard TIG torches SR-17, SR-26, and SR-18 with no need for adapters.
- ❓ Practical dimensions: 46x0.8x21 mm with M8 thread, ensuring quick and secure assembly.
- ❓ Functional format: Blister pack with 2 units, perfect for workshop or on-site jobs.
- ❓ At Solter, we develop consumables that optimize your work. This nozzle ensures even gas distribution and cleaner results from the very first pass.
