

DIFUSER GAS SR-17/26/18 D1 (2u.)

Ref. 06203

❓ The **SR-17/26/18 D1 Gas Diffuser** from Solter is an essential component for TIG torches, designed to ensure even distribution of shielding gas in precision welding. Compatible with SR-17, SR-26, and SR-18 torches, this 1 mm diameter diffuser provides a consistent gas curtain that protects the weld pool and tungsten electrode, preventing defects such as oxidation. Made from heat- and corrosion-resistant materials, it ensures long-lasting durability even in demanding environments. Sold in packs of 2 units. Want to improve the quality of your TIG welds? Add this Solter diffuser to your setup!

Main Features:

- ❓ **Optimal gas distribution:** The diffuser channels and disperses the shielding gas evenly, essential for achieving clean, impurity-free welds.
- ❓ **Professional compatibility:** Specifically designed for SR-17, SR-26, and SR-18 torches, ensuring a perfect fit and secure electrode fastening.
- ❓ **1 mm diameter precision:** Ideal for applications requiring controlled gas flow, such as work on stainless steel or fine alloys.
- ❓ **High durability:** Made from materials such as brass or copper, resistant to heat and corrosion, extending its service life under intensive use.
- ❓ **Electrode support:** In addition to distributing gas, it also helps center and hold the tungsten electrode, promoting arc stability.
- ❓ **At Solter, we understand that the quality of a TIG weld depends on every component. That's why our diffusers are precisely engineered and built for demanding, professional environments.**
