

DIFUSER GAS SR-17/26/18 D2,4 (2u)

Ref. 06246

Main Features:

- ☑ 2.4 mm diameter for higher flow: Ideal for welds requiring broader gas coverage, such as work with aluminum, thick steel, or large-section parts.
- ☑ Compatible with SR-17/26/18 torches: Easy and secure installation on the most common TIG torch models, ensuring compatibility and functionality.
- ☑ Uniform gas distribution: Its design with multiple strategically placed holes provides a stable, turbulence-free gas curtain.
- ☑ Precision in electrode positioning: Ensures accurate centering of the tungsten electrode, resulting in a stable arc and uniform weld beads.
- ☑ Robust construction: Made from materials resistant to extreme heat and corrosion, delivering consistent performance even under intensive use.
- ☑ At Solter, every detail matters. That's why our diffusers are designed to deliver reliability, efficiency, and quality in every TIG weld you perform.
