

DIFUSER GAS SR-SR-17/26/18 D3,2 (2u)

Ref.06247

❓ The SR-17/26/18 D3.2 Gas Diffuser from Solter is the perfect complement for high-demand TIG welding that requires a greater flow of shielding gas. With a 3.2 mm diameter, this diffuser allows the use of large electrodes while maintaining a constant and stable protective atmosphere. Compatible with SR-17, SR-26, and SR-18 torches, its design ensures proper electrode positioning and a balanced electric arc. Supplied in a pack of 2 units. Looking for maximum gas coverage and reliability? This Solter diffuser is made for you!

Main Features:

- ❓ Efficient diffusion with 3.2 mm diameter: Ideal for applications using large-diameter electrodes where broader argon gas shielding is required.
- ❓ Guaranteed compatibility: Designed for TIG torches SR-17, SR-26, and SR-18, ensuring a perfect, gap-free fit.
- ❓ Full weld pool coverage: Its internal structure distributes the gas evenly, preventing turbulence and ensuring a homogeneous inert atmosphere.
- ❓ Arc stability and electrode support: Promotes a steady arc thanks to the correct positioning of the tungsten electrode.
- ❓ Durable and resistant material: Built with high thermal and corrosion-resistant materials to deliver sustained performance in demanding conditions.
- ❓ Solter supports you in every weld with solutions designed for professionals. This diffuser ensures precision, stability, and high-quality results in TIG applications.
