

CERAMIC CUP LENSE SR-17/26/18 GR5 (2u)

☞The Gas Lens Nozzle SR-17/26/18 GR7 (Ref. 06712) is your ally in TIG welding where gas control and arc stability are essential. Thanks to its GR7 diameter, it allows work with extended electrodes while maintaining uniform coverage over the weld pool. Its ceramic body withstands intense thermal cycles, making it ideal for critical applications.

Includes 2 units, compatible with SR-17, SR-26, and SR-18 torches.

Boost your TIG precision with Solter reliability!

CERAMIC CUP LENSE SR-17/26/18 GR5 (2u)

Main Features:

- ☑ Guaranteed compatibility with TIG torches SR-17, SR-26, and SR-18, used in high-performance professional environments.
- ☑ GR7 format: ideal ratio for working with extended electrodes without losing stability or protection.
- ☑ High-density ceramic body, designed to withstand extreme temperatures without cracks or deformations.
- ☑ Pack of two (2 units), ready for assembly line tasks or preventive maintenance.
- ☑ Especially useful for jobs requiring a long and precise arc, such as internal welds, tube joints, or open geometries.
- ☑ Reduces the risk of air contamination, such as oxide or nitrogen inclusion, thanks to its effective enveloping protection.
- ☑ Solter doesn't just design components—it designs solutions. This GR7 nozzle enhances the quality of your TIG welds, delivering safety, consistency, and excellence in every bead.
