

# CUTTING TIP LONG 0,9 30-40A PT20C/60 2u **SOLTER**

Ref. 55978

☑ The 0.9 mm long nozzle compatible with PT60 torches is ideal for more demanding cuts within the 30 to 40 amp range. Its extended design allows for greater distance between the torch and the material, enhancing cooling and reducing thermal wear. Made from high-quality copper, it ensures a stable and consistent arc even during prolonged sessions. Recommended for medium-thickness metal structures and tasks requiring depth and control. Includes 2 units. Want cleaner, more powerful, and longer-lasting cuts? Add this Solter nozzle to your setup and work with total confidence!

## Main Features:

- ☑ 0.9 mm diameter – 30–40A range: Ideal for more intense cutting tasks, maintaining precision and power in medium-duty jobs.
- ☑ Long design for deep cuts and better cooling: The extended plasma path helps dissipate heat away from the torch, improving its lifespan and reducing the risk of overheating.
- ☑ Guaranteed compatibility with PT60 torches: Secure, stable mounting with no gas leaks, ensuring consistent efficiency at all times.
- ☑ High-quality copper construction: Excellent thermal conductivity and wear resistance, even during extended operations.
- ☑ Includes 2 units: Pack designed for professionals who need immediate replacement availability and uninterrupted operation.
- ☑ Recommended applications: Cutting medium metal structures, industrial maintenance, component manufacturing, and technical dismantling.
- ☑ Quick and easy replacement: Intuitive coupling system that requires no special tools, saving valuable time in field or workshop tasks.
- ☑ With Solter, every component is engineered with technical precision and tested in real-world conditions. This long nozzle is perfect for operators working under constant demand who need reliable consumables.
