

SPACER PT60

Ref. 55981

❓The **PT60 plasma torch guide wheel** from Solter is the ideal accessory for achieving more precise, safer, and uniform cuts. Designed to maintain a constant distance between the nozzle and the metal surface, it **enhances cutting stability and extends the service life of consumables**. Made of durable steel, it's the perfect solution for professionals and operators looking to optimize their plasma cutting performance. Need to improve the precision of your cuts?

Incorporate the PT60 torch into your equipment!

Main Features:

- ❓ **Cutting stability:** The guide shoe acts as a support, maintaining the ideal distance between the nozzle and the material, resulting in straighter and more controlled cuts.
- ❓ **Extended consumable lifespan:** By preventing direct contact between the torch and the metal surface, it reduces wear on the nozzle and other components.
- ❓ **Ease of use:** Ideal for less experienced operators or tasks that require high precision.
- ❓ **Guaranteed compatibility:** Specifically designed for PT60 plasma torch models, widely used in industrial environments.
- ❓ **Robust construction:** Made of durable steel rod for reliable performance even under demanding conditions.
- ❓ **Lightweight and functional accessory:** Easily installs without special tools, allowing for immediate and practical use.
- ❓ At Solter, every accessory is designed to make the welder's job easier. The PT60 torch guide shoe reflects that commitment: simplicity, efficiency, and professional results at your fingertips.
