

CUTTING TIP SHORT 1,0 40-50A PT20C/60 2u. **SOLTER**

Ref. 55983

❓ The 1.0 mm short nozzle for PT-20C/PT60 torches is designed for demanding cuts in the 40 to 50 amp range. Its compact design enables defined cuts in tight spaces, offering excellent arc control and process efficiency. Made from high-conductivity materials, it withstands extreme temperatures and maintains a consistent plasma flow. Includes 2 units for quick replacement. Want clean, professional cuts even at higher intensities? Trust Solter's technical quality and boost your performance in every application!

Main Features:

- ❓ 1.0 mm diameter for 40–50A: Ideal for tasks requiring higher intensity and deeper cuts without sacrificing precision.
- ❓ Short format: Its compact design improves control in detailed cuts, especially in hard-to-reach areas.
- ❓ Fully compatible with PT-20C/PT60 torches: Perfect replacement for one of the most widely used torch models in plasma cutting.
- ❓ High thermal resistance: Made with alloys that withstand prolonged use at high temperatures, extending the lifespan of both the consumable and the torch.
- ❓ 2-unit pack presentation: Designed for operators who value continuity and efficiency in daily work.
- ❓ Recommended applications: Cutting thick metal structures, heavy industry, maintenance work, and fabrication in steel and stainless steel.
- ❓ Quick installation: Simple adjustment system for immediate replacement without additional tools, reducing downtime in the workshop or on-site.
- ❓ Solter develops robust consumables for demanding environments, ensuring compatibility, durability, and efficiency. This short nozzle is a reliable ally in processes that demand both power and control.
