

CUTTING TIP SHORT 1,1 50-60A PT20C/60 2u. **SOLTER**

Ref. 55984

☐ The 1.1 mm short nozzle for PT60 torches is designed for high-intensity cuts, operating with currents between 50 and 60 amps. Its compact size allows precise control in hard-to-reach areas, while its design ensures a stable arc even under prolonged demand. Made from materials with excellent thermal conductivity, it enhances cutting efficiency and protects the torch's internal components. Includes 2 units. Looking for performance and precision under demanding conditions? Add this Solter nozzle to your setup and work without limits!

Main Features:

- ☐ **Designed for high amperage (50–60A):** With a 1.1 mm diameter, it's built for cutting operations with high energy demands, enabling clean and precise penetration of thicker materials.
- ☐ **Short format:** Ideal for tasks requiring close access to the cutting point, greater maneuverability, and precision in confined spaces.
- ☐ **Full compatibility with PT60 torches:** Perfect for quick and hassle-free replacements in torches commonly used in plasma cutting processes.
- ☐ **Durable and heat-resistant material:** Withstands long working hours without deforming or losing efficiency.
- ☐ **2-unit pack:** Practical and cost-effective solution to keep your workshop stocked with quality consumables.
- ☐ **Suggested applications:** Cutting thick metal structures, industrial fabrication, maintenance on metal worksites, dismantling, and continuous cuts on steel.
- ☐ **Easy replacement:** Direct torch fitting without additional tools, enabling quick changeover in record time.
- ☐ The trust of those who choose Solter is built with every cut. This short nozzle meets the highest industry standards, backed by technical support and top-quality materials.
