

TIP M6 D0.8 L28 10u

Ref. 56028

❓ The **M6 D0.8 L28 Contact Tip** from Solter is the essential component to optimize the performance of your **MIG/MAG torches**. Designed to ensure stable current transfer and precise welding, its high-conductivity copper construction guarantees efficient contact with **0.8 mm wires**. Featuring an **M6 thread**, it is compatible with a wide range of torches, allowing for quick and secure installation. It comes in a convenient **blister pack of 10 units** for added convenience. Maximize the quality of your welds with Solter!

Key Features:

- ❓ **Universal Compatibility:** Designed for MIG/MAG torches with M6 thread, ensuring a perfect and secure fit.
- ❓ **High Precision:** Ideal for 0.8 mm welding wires, ensuring stable current transfer and a consistent arc.
- ❓ **Quality Material:** Made of high-conductivity copper for greater efficiency and durability.
- ❓ **Optimized Dimensions:** 0.8 x 20 x 28 mm, providing reliable contact with the welding wire.
- ❓ **Easy to Install:** Its standard M6 design allows for quick and hassle-free installation.
- ❓ **Practical Packaging:** Comes in a blister pack of 10 units, ideal for organized storage and easy transport.
- ❓ Trust Solter for consumables that guarantee maximum efficiency in every welding project.
