

GAS DISTRIBUTOR ANT. SOLCUT 100 PRO 1Un. SOLTER

Ref. 56289

¿The PT-120 Diffuser by Solter is a high-performance component designed for plasma cutting torches that demand maximum power and stability. Compatible with the PT-120 torch and the SOLCUT 100 PRO system, it ensures perfect gas distribution for clean, straight, and distortion-free cuts. Its ceramic structure protects the electrode and nozzle from extreme heat. Working with demanding materials? Make every cut count with this professional-grade diffuser!

Main Features:

- ¿ Professional performance at high amperage: Designed to operate with equipment up to 100A, making it ideal for demanding industrial cutting tasks.
- ¿ Plasma arc stabilization: Creates a vortex gas flow that keeps the arc centered and steady, improving cutting quality.
- ¿ Internal thermal protection: Acts as a barrier between the electrode and the nozzle, extending the lifespan of the consumables.
- ¿ Rugged ceramic construction: Technical material with high heat resistance, ideal for extended duty cycles.
- ¿ Guaranteed compatibility: Specifically designed for PT-120 torches included in the SOLCUT 100 PRO, the most powerful model in the range.
- ¿ At Solter, we know that cutting quality depends not only on the equipment but also on each individual component. That's why we develop consumables that boost your performance.
