

KIT iCON 2055 Wi 4G + MALETIN

- Inverter 200Amp al 60%.
- Equipped with welding accessories and case
 - Valid for generators
 - TIG Lift-Arc.
 - Digital regulation
- Antishock DDR construction.
- With the technologies Geolocalisationn 4G, Wifi, Connect & WaaS.

Main features:

Talking about professional welding is talking about the iCON product line. Due to its patented and innovative DDR construction design, due to its great capacity to work under intensive conditions and demanding environments and due to its unmatched results in terms of reliability and performance, this is undoubtedly the best option for the most demanding professionals.

- Arc stability and control regardless of the electrode-material distance, thanks to regulation by ARCSENSE.
- Double automatic ventilation, acting only when the equipment requires it.
- STAND-BY position, when the equipment is not in operation.
- Equipped with Anti-stick, Arc-Force, HotStart and Lift-Arc (TIG) devices.
- Can be connected to generators with a wide range of working voltages.

TECHNICAL FEATURES

Generales	
Duty Cycle at 40°C	60%
Regulation	10 - 200A
Intensity MAX.	200A
Intensity at 60%(100%) a 40°C	200A (140A)
Tecnicos	
Usable electrodes TIG	1,0 - 3,2mm
Usable electrodes MMA	1,6mm - 4,0mm
Estructurales	
Ventilation	DOBLE - AUTO
Weight	6,4Kg
Regulation board	SOLTER ICON DIGITAL
Standards	EN-60974-1, EN-60974-10
Protection index	IP23C
Dimensions	430x175x325 mm
Eléctricas	
I _{max}	42A
OCV	68V
Voltage range	180V - 300V
Absorved power max.	9,5KVA
I _{eff}	29,7A
Fuse	16A
Connection	230V - 1Ph

OPTIONAL ACCESSORIES

ANTORCHA 4M TIG SR-17V
D35/50
Ref. 06031

REGULADOR R25 AR/CO2
Ref. 56246
