

SOLFLASH 70A 12V HF

Ref. 10356

 **SOLTER**

❓ The **SOLFLASH 70A 12V HF** from Solter is a professional charger designed to optimize the charging and maintenance of batteries in mechanical workshops, dealerships, and fleets. Compatible with lead-acid, AGM, gel, LFP, and lithium-ion batteries, it offers safe charging adaptable to any need. Its touch LCD screen allows selecting voltage, current, and battery type, ensuring total control. In addition, it features a showroom mode for display vehicles, allowing the vehicle's electrical systems, such as lights, to remain on without draining the battery and a stabilized 70A power supply function, ideal for electrical diagnostics and ECU programming. Power, safety, and cutting-edge technology with Solter quality!

Main Features:

- ❓ **Multi-mode smart charging:** Compatible with lead-acid, AGM, gel, LFP, and lithium-ion batteries, adapting to light vehicles, industrial vehicles, and heavy machinery.
- ❓ **Touch LCD screen:** Intuitive interface that allows selecting voltage, current, and battery type, with real-time visualization of the charging process.
- ❓ **Automatic float mode:** Keeps the battery fully charged without overcharging, ideal for long-term storage in workshops or reserve vehicles.
- ❓ **Showroom Function:** Provides stable power to display vehicles, allowing lights and electrical systems to remain active without draining the battery.
- ❓ **Stabilized power supply:** Provides a constant current of up to 70A, ideal for electrical diagnostics, ECU programming, and electronic system maintenance.
- ❓ **Comprehensive protection:** Advanced system against reverse polarity, overloads, and short circuits, ensuring safe and reliable use in professional environments.
- ❓ **High energy efficiency:** High-frequency technology that optimizes power consumption and ensures maximum performance in every charge.
- ❓ **Clamp set included:** The unit comes with a dedicated clamp set ensuring safe and efficient connections.
- ❓ Trust Solter to keep your batteries in perfect condition with equipment designed for the most demanding professionals.

SOLFLASH 70A 12V HF

Ref. 10356

TECHNICAL DATA

Technical	
Voltaje de carga	12V
Corriente de carga Arith.	3 - 70A
Tipo batería	Todos los tipo de baterías de 12V
Capacidad de carga max.	20-840Ah
Fuente alimentación	70A

Structural	
Protection index	IP31
Weight	3Kg
Dimensions	290x180x130mm

Electrical	
Supply Voltage	220-240VAC 50/60Hz

OPTIONAL ACCESSORIES

Ref. 10405

KIT POWER SUPPLY
