

SPOOL GUN 6m

Ref. 10520

Spool Gun torch compatible with **D100** diameter wire spools and drag built into the handle. **6m** cable length. Thanks to its design (short distance between the wire spool, the drive motor and the torch tip) it is ideal for welding soft materials such as aluminium without the wire getting tangled. Perfect for industries where different welding materials are used for the same job, e.g. **automotive**.

Main features:

- Allows **0,8 mm** aluminium wire to be welded on thin thicknesses
- Control of welding power from the torch
- Prevents twine entanglement in the driving motor
- Válida para **Fe, Inox, Al y CuSi3**
- Operates with independent gas
- Welding power up to **180A CO2/ 150A ArCO2** at 60%
- Power regulation by remote control

SPOOL GUN 6m

Ref. 10520

TECHNICAL DATA

Generals	
Intensity MAX.	180A CO2 / 150A Mixed Gases
Duty Cycle at 40°C	60%
Technical	
Usable wire coil	D100 - 1kg
Structural	
Weight	3,7 kg

OPTIONAL ACCESSORIES

Ref. 10526

RULINA Ø1,0mm SPOOL GUN
